

#TN073 Using the Admiralty Digital Catalog to order charts

If you need to order AVCS or ARCS charts then the easiest way is to use the Admiralty Digital Catalog (ADC) to select the required cells/Charts, create a basket and email it to sales@euronav.co.uk.

The Admiralty Digital Catalogue (ADC) allows you to easily select required AVCS (ENC) cells either by area or by inputting a route.

[To download the ADC](#)

<https://www.admiralty.co.uk/publications/admiralty-digital-catalogue>

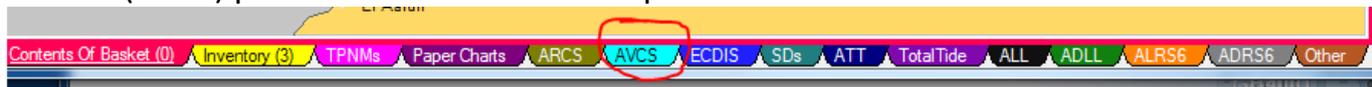

Then select the link shown below - The full version
The name will vary as its updated over time..

Download the ADMIRALTY Digital Catalogue

Unzip the download, and run the setup program
Once installed start the ADC application

For S57 (AVCS) products select the AVCS option on the bottom tabs

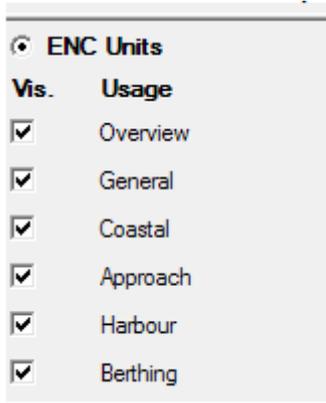

1. Selecting cells by area

Important : May 2022

Unfortunately the preset folios have now been discontinued by the Admiralty, please ensure you select ENC units option only and untick the folio option (still showing due to technical reasons at the Admiralty)

Select individual cells, you can select the level of detail to be shown

Create a basket of required cells and send to sales@euronav.co.uk

2. Selecting cells by route:

Route menu -> Create Route. Enter the required waypoints (left click to add waypoints)

Save the Route Route->Save

Select AVCS on the bottom bar.

Select ENC units - Tick all boxes.

Route-> Route to basket.

Then save the basket and email to sales@euronav.co.uk

You can also mix the two methods to add port of refuge etc.
